

THE 10-SECOND VERSION

When your client says...

"We're wasting too much time doing this manually."

"Everyone here is using AI and I don't know what they're putting into it."

"We want to use AI, but I'm worried about our data."

"Our software systems don't talk to each other."

"A customer just asked us for a SOC 2 report."

"These customer security questionnaires are getting ridiculous."

"We're trying to move into larger customers."

"We're trying to win government business."

"We don't have anyone internally who really owns AI governance."

"We have security policies, but I'm not sure we could prove the controls are working."

"We know this should be automated, but we don't know where to start."

That's a BSTS conversation.

BEFORE YOU INTRODUCE ANYONE

You identify the business problem. BSTS helps determine the technology path.

WHAT HAPPENS AFTER A REFERRAL

DISCOVER	Understand the business problem first.
ASSESS	Process, systems, data, risk, obligations.
RECOMMEND	In writing, with reasons.
IMPLEMENT	Only if it makes sense.

**No forced AI.
No solution looking for a problem.**

Have a client in mind?

Talk to us *before* you make the introduction.
You are putting your own reputation behind it.

Good BSTS referrals don't need to know

KEEP THIS NEAR YOUR DESK

What you hear → where BSTS may help

"This process is incredibly manual."

→ **SECURE AI & AUTOMATION**

"Our employees are putting company information into AI."

→ **AI SECURITY & GOVERNANCE**

"We need SOC 2."

→ **SOC 2 READINESS**

"Our customer wants evidence of our cybersecurity controls."

→ **SECURITY & COMPLIANCE READINESS**

"Our systems don't communicate."

→ **WORKFLOW / SYSTEM INTEGRATION**

"We want AI, but our data can't be exposed."

→ **SECURE AI ARCHITECTURE**

"We're moving into regulated or government work."

→ **SECURITY / FRAMEWORK READINESS**

You do not need to diagnose the solution. Naming the symptom is enough — scoping is our job, and we do it before anyone is asked to buy anything.

what technology they need. They only need

THE PROFILE

Who should you introduce to BSTS?

A growing small-to-mid-sized organization, roughly **20–250 employees**, that handles customer, proprietary, or regulated information.

OFTEN MISSING INTERNALLY

- An AI team
- A cybersecurity team
- A compliance function

OFTEN PRESENT

- Repetitive administrative workflows
- Disconnected applications
- Employees experimenting with AI
- Rising customer security requirements
- Security questionnaires arriving
- SOC 2 pressure from a large customer
- Government contracting ambitions
- Real concern about AI adoption risk

COMMON SECTORS — NOT A LIMIT

B2B SaaS · professional services · government contractors · health technology · regulated technology · any organization holding sensitive customer information

a business problem worth solving.

WHAT YOUR CLIENT GETS

What BSTS brings to the table

SECURE AI & AUTOMATION

Reduce repetitive work and connect business processes without sacrificing control of company data.

AI SECURITY & GOVERNANCE

Establish responsible boundaries around AI, sensitive information, access, vendors, high-risk use cases, and human oversight.

SOC 2 & COMPLIANCE READINESS

Prepare controls, evidence, policies, and remediation for rising cybersecurity expectations from customers.

YOUR CLIENT RELATIONSHIP COMES FIRST

BSTS works alongside your client's existing IT team, MSP, cybersecurity provider, CPA or auditor, attorney, business consultant, and fractional executives — complementing those relationships rather than replacing them.

BSTS does not provide accounting, audit, legal, or tax services. BSTS does not issue SOC 2 reports. SOC 2 examinations and attestation reports are performed by qualified independent CPA firms. BSTS sells no licenses and takes no vendor commissions.
